Education

2017-2021

- College of Engineering and Technology

Pursuing a Bachelor's degree in Textile Sciences and Engineering, which emphasises on fabric manufacturing and associated technology

2016-2017

- Orissa Engineering College

Dropped out of the college in the freshman year but acquired knowledge on the basics of a few programming languages during my short tenure

2004-2016

- Pracheen Kala Kendra Academy

Completed by Bachelor's degree in Fine and Studio Arts and gained a huge amount of knowledge on the specific domain and took it as a profession as well

2004-2016

- St. Xavier's High School

Completed by secondary and intermediary education from St. Xavier's High School affiliated to Central Board of Secondary Education

Experience

2020-Present

- Nirmitee.io

Worked on numerous projects involving product designing. The whole process offered meaningful insights at different levels of production, from scratch to delivery

2020-2021

- Milk Mantra

Engaged as a product designer for enhancing the online delivery system. Moreover contributed towards developing a LMS platform for a new product launching soon

2020-2021

- Gamiac Studios

A new customer support system where a complete CRM platform has been developed along with MVP testing by the end of 2020

2020-2021

- Genetico

A part of the developers' team building platforms for detection of rare diseases through some contemporary genetic studies and research

2020-2021

- Bizman

Worked on a broad range of projects managing websites, mobile applications, branding projects and creative aspects of marketing

These organisations ranging from budding startups to established companies, gave me the opportunity to develop products with my crewmates some of which have been shipped successfully rest being under the development process. Some projects are not meant to be shared according to the company rules. I have gathered expertise in preparing a roadmap to be followed during product development which can ensure smooth and organised workflow. I emphasise on data collection through user research for mapping and building the whole architecture including insertion of wireframes, designing and prototyping high-fidelity screens. Apart from that I maintain parallel coordination with the development team to abide to the deadline for product shipment
